

S3 Ghana MED422 — Final 1 lecture-focus report

Scope: 55 questions from Final 1 only · 22/50 canonical lectures represented · 7 genuine cross-lecture overlaps.

Counts use each question's primary likely lecture. They are revision signals from this paper—not guarantees of future exam weighting. Answer-key provenance and lecture-match confidence are kept separate.

Bottom line

- **Concentrated paper:** 12 lectures with at least 3 questions account for **38/55 (69.1%)** of the deck.
- **First priority:** T1.L5 Prenatal screening and diagnosis and T1.L13 Hypertension in pregnancy lead with **4 questions each**.
- **Test 1 dominates:** 38/55 questions (69.1%) map to Test 1 lectures.
- Best use: master the 2 leaders, then the 10 other three-question clusters before the two-question and singleton topics.

Recommended revision order

Priority	Lectures	Questions covered	Deck share
Tier 1 — highest	T1.L5 Prenatal screening and diagnosis (4); T1.L13 Hypertension in pregnancy (4)	8	14.5%
Tier 2 — major clusters	T1.L1 The menstrual cycle & reproductive endocrinology (3); T1.L6 Amenorrhea-dysmenorrhea-PMS (3); T1.L7 Polycystic ovary syndrome (3); T1.L8 Bleeding in early pregnancy (3); T1.L15 Medical Diseases & Pregnancy 2 (3); T1.L16 Medical Diseases & Pregnancy 3 (3); T2.L11 Benign diseases of the ovary (3); T2.L12 Endometriosis and adenomyosis (3); T3.L6 Contraception (3); T3.L9 Preterm labour and PROM (3)	30	54.5%
Tier 3 — supporting	T1.L2 Fetus, placenta, membranes and amniotic fluid (2); T1.L3 Sexual development & Puberty (2); T1.L4 Preconceptional counselling and antenatal care (2); T1.L10 Multifetal gestation (2); T1.L14 Medical Diseases & Pregnancy 1 (2); T2.L5 Anatomy of the pelvis & mechanism of normal labor (2); T2.L7 Management of normal labour (2)	14	25.5%
Tier 4 — singletons	T1.L9 Antepartum hemorrhage (1); T1.L12 Abnormal uterine bleeding (1); T2.L10 Psychosocial problems & women's health (1)	3	5.5%

Test-group distribution

Test group	Questions	Share	Distinct primary lectures
Test 1	38	69.1%	15
Test 2	11	20.0%	5
Test 3	6	10.9%	2

Complete primary lecture footprint

Every question is represented in the question-number column; repeated numbers are not hidden by the ranking.

Lecture	Questions	Count	Share
T1.L5 — Prenatal screening and diagnosis	Q8, Q10, Q11, Q12	4	7.3%
T1.L13 — Hypertension in pregnancy	Q9, Q24, Q25, Q26	4	7.3%
T1.L1 — The menstrual cycle & reproductive endocrinology	Q16, Q17, Q18	3	5.5%
T1.L6 — Amenorrhea-dysmenorrhea-PMS	Q20, Q21, Q59	3	5.5%
T1.L7 — Polycystic ovary syndrome	Q56, Q57, Q58	3	5.5%
T1.L8 — Bleeding in early pregnancy	Q13, Q14, Q15	3	5.5%
T1.L15 — Medical Diseases & Pregnancy 2	Q5, Q6, Q7	3	5.5%
T1.L16 — Medical Diseases & Pregnancy 3	Q27, Q28, Q29	3	5.5%
T2.L11 — Benign diseases of the ovary	Q50, Q51, Q52	3	5.5%
T2.L12 — Endometriosis and adenomyosis	Q47, Q48, Q49	3	5.5%
T3.L6 — Contraception	Q53, Q54, Q55	3	5.5%
T3.L9 — Preterm labour and PROM	Q30, Q31, Q32	3	5.5%
T1.L2 — Fetus, placenta, membranes and amniotic fluid	Q1, Q2	2	3.6%
T1.L3 — Sexual development & Puberty	Q22, Q23	2	3.6%
T1.L4 — Preconceptional counselling and antenatal care	Q3, Q4	2	3.6%
T1.L10 — Multifetal gestation	Q33, Q34	2	3.6%
T1.L14 — Medical Diseases & Pregnancy 1	Q35, Q36	2	3.6%
T2.L5 — Anatomy of the pelvis & mechanism of normal labor	Q43, Q44	2	3.6%
T2.L7 — Management of normal labour	Q45, Q46	2	3.6%

Lecture	Questions	Count	Share
T1.L9 — Antepartum hemorrhage	Q42	1	1.8%
T1.L12 — Abnormal uterine bleeding	Q19	1	1.8%
T2.L10 — Psychosocial problems & women’s health	Q60	1	1.8%

Mapping quality and answer provenance

Measure	Questions	Share
Lecture match — Strong	51	92.7%
Lecture match — Likely	2	3.6%
Lecture match — Possible	2	3.6%
Answer provenance — Circled in captured paper	0	0.0%
Answer provenance — Inferred/reconstructed	55	100.0%
Answer provenance — Unknown/unrecorded	0	0.0%

All 55 Final 1 answer keys are marked **inferred** in the legacy deck data. This is a provenance limitation, not a downgrade of the lecture mapping: 51/55 lecture matches are strong.

Lower-confidence mappings to review carefully

Likely lecture	Q	Match	Why confidence is lower
T1.L12 — Abnormal uterine bleeding	19	Possible	The AUB lecture is the best topical match, but it does not teach low ferritin as a predictor of heavy menstrual bleeding and says ferritin is not routinely required.
T1.L6 — Amenorrhea-dysmenorrhea-PMS	21	Possible	The dysmenorrhea lecture is the correct topical home and defines TENS, but the verified text does not support the specific high-frequency TENS efficacy claim.
T2.L5 — Anatomy of the pelvis & mechanism of normal labor	43	Likely	Mechanism and normal-labour lectures both directly support active labour at 7 cm and non-engagement at –2; medium reflects defensible primary/alternate ordering.
T2.L7 — Management of normal labour	46	Likely	The normal-labour lecture covers second-stage perineal care and episiotomy, but not warm compresses or controlled head delivery; it is a topical rather than exact match.

Genuine cross-lecture overlaps — 7/55 questions

Primary → alternate	Q
T1.L4 — Preconceptional counselling and antenatal care → T2.L8 — Disorders of fetal growth	3
T1.L5 — Prenatal screening and diagnosis → T2.L9 — Role of Ultrasound in obstetric	8
T1.L5 — Prenatal screening and diagnosis → T2.L9 — Role of Ultrasound in obstetric	12
T1.L3 — Sexual development & Puberty → T3.L2 — Gynecological problems in childhood & adolescence	22
T2.L5 — Anatomy of the pelvis & mechanism of normal labor → T2.L7 — Management of normal labour	43
T2.L12 — Endometriosis and adenomyosis → T3.L1 — Subfertility	49
T1.L6 — Amenorrhea-dysmenorrhea-PMS → T2.L10 — Psychosocial problems & women's health	59

Source and item cautions

- **Answer-key provenance:** all 55 keyed answers are inherited as inferred rather than visibly circled/source-confirmed.
- **Source numbering:** this retained deck contains Q1-36 and Q42-60; Q37-41 are absent from the source, which is why 55 questions extend through Q60.
- **Q19:** low ferritin is not explicitly supported by the verified AUB lecture as a predictor of heavy menstrual bleeding.
- **Q21:** the dysmenorrhea lecture is the topical home, but the exact high-frequency TENS efficacy claim is absent from the verified text.
- **Q46:** the normal-labour lecture is the best topical match, but it does not state the exact warm-compress/controlled-head-delivery detail.

Detailed evidence

- `final-1-question-to-lecture-map.csv` — all 55 questions with full text, primary/alternate lecture, confidence, rationale, keyed answer, and provenance.
- `final-1-lecture-focus-data.json` — machine-readable deck-only counts and mappings.
- The quiz's **Likely lecture** flag shows the same mapping beside each live question.
