

S3 Ghana MED422 — Final 2 lecture-focus report

Scope: 48 questions from Final 2 only · 43/50 canonical lectures represented · 17 genuine cross-lecture overlaps.

Counts use each question's primary likely lecture. They are revision signals from this paper—not guarantees of future exam weighting. Answer-key provenance and lecture-match confidence are kept separate.

Bottom line

- **Broad-coverage paper:** 43 distinct primary lectures appear across 48 questions; no lecture appears more than **2 times**.
- Only **5 lectures** repeat; the other 38 represented lectures appear once each.
- **Even test-group spread:** Test 1, Test 2, and Test 3 each contribute **16 questions**.
- Best use: revise broadly across all three tests, then give the 5 repeated lectures a short extra pass. Do not overfit to a narrow cluster.

Recommended revision order

Extra-pass lectures

These are the only lectures repeated in Final 2. Each contributes two questions.

Lecture	Questions	Deck share
T1.L4 — Preconceptional counselling and antenatal care	Q8, Q23	4.2%
T1.L7 — Polycystic ovary syndrome	Q16, Q48	4.2%
T2.L2 — Menopause	Q10, Q14	4.2%
T2.L13 — Fetal malposition & malpresentations	Q4, Q45	4.2%
T3.L2 — Gynecological problems in childhood & adolescence	Q31, Q42	4.2%

After these 5, use a **broad-sweep strategy**: the remaining 38 questions each map to a different lecture, so breadth matters more than ranking among the singletons.

Test-group distribution

Test group	Questions	Share	Distinct primary lectures
Test 1	16	33.3%	14
Test 2	16	33.3%	14
Test 3	16	33.3%	15

Complete primary lecture footprint

Every question is represented in the question-number column; repeated numbers are not hidden by the ranking.

Lecture	Questions	Count	Share
T1.L4 — Preconceptional counselling and antenatal care	Q8, Q23	2	4.2%
T1.L7 — Polycystic ovary syndrome	Q16, Q48	2	4.2%
T2.L2 — Menopause	Q10, Q14	2	4.2%
T2.L13 — Fetal malposition & malpresentations	Q4, Q45	2	4.2%
T3.L2 — Gynecological problems in childhood & adolescence	Q31, Q42	2	4.2%
T1.L1 — The menstrual cycle & reproductive endocrinology	Q35	1	2.1%
T1.L2 — Fetus, placenta, membranes and amniotic fluid	Q24	1	2.1%
T1.L3 — Sexual development & Puberty	Q1	1	2.1%
T1.L5 — Prenatal screening and diagnosis	Q21	1	2.1%
T1.L6 — Amenorrhea-dysmenorrhea-PMS	Q47	1	2.1%
T1.L8 — Bleeding in early pregnancy	Q38	1	2.1%
T1.L9 — Antepartum hemorrhage	Q11	1	2.1%
T1.L10 — Multifetal gestation	Q13	1	2.1%
T1.L11 — Hyperemesis gravidarum	Q34	1	2.1%
T1.L13 — Hypertension in pregnancy	Q46	1	2.1%
T1.L14 — Medical Diseases & Pregnancy 1	Q19	1	2.1%
T1.L16 — Medical Diseases & Pregnancy 3	Q9	1	2.1%
T2.L1 — Infections & vaccinations in pregnancy	Q37	1	2.1%
T2.L3 — RH isoimmunization	Q20	1	2.1%

Lecture	Questions	Count	Share
T2.L4 — Benign lesions of uterus & Cervix	Q36	1	2.1%
T2.L6 — Infections of the genital tract	Q15	1	2.1%
T2.L7 — Management of normal labour	Q18	1	2.1%
T2.L8 — Disorders of fetal growth	Q5	1	2.1%
T2.L11 — Benign diseases of the ovary	Q44	1	2.1%
T2.L12 — Endometriosis and adenomyosis	Q41	1	2.1%
T2.L14 — Endometrial hyperplasia and endometrial cancer	Q6	1	2.1%
T2.L15 — Pelvic organ prolapse	Q17	1	2.1%
T2.L16 — Urinary incontinence	Q27	1	2.1%
T2.L17 — Operative vaginal delivery (case-based)	Q32	1	2.1%
T3.L3 — Anesthesia and analgesia in labour	Q33	1	2.1%
T3.L4 — Postmaturity and induction of labor	Q25	1	2.1%
T3.L5 — Cesarean section	Q30	1	2.1%
T3.L6 — Contraception	Q3	1	2.1%
T3.L7 — Cervical cancer & screening	Q7	1	2.1%
T3.L9 — Preterm labour and PROM	Q28	1	2.1%
T3.L10 — Abnormal labour and its management (case-based)	Q40	1	2.1%
T3.L11 — Emergency gynecology (case-based)	Q26	1	2.1%
T3.L12 — Postnatal care and puerperal sepsis	Q29	1	2.1%
T3.L13 — Atrophic & dystrophic conditions of the vulva	Q22	1	2.1%
T3.L14 — Minimally invasive surgery in gynecology	Q39	1	2.1%
T3.L15 — Malignant ovarian tumors	Q43	1	2.1%
T3.L16 — Maternal collapse and its management (case-based)	Q12	1	2.1%
T3.L17 — PPH & other Obstetric emergencies (case-based)	Q2	1	2.1%

Mapping quality and answer provenance

Measure	Questions	Share
Lecture match — Strong	45	93.8%
Lecture match — Likely	3	6.3%
Lecture match — Possible	0	0.0%
Answer provenance — Circled in captured paper	0	0.0%
Answer provenance — Inferred/reconstructed	1	2.1%
Answer provenance — Unknown/unrecorded	47	97.9%

Final 2 has 47 questions with **unknown/unrecorded** answer provenance. Q41 alone is explicitly inferred/reconstructed from a truncated capture. Unknown is not treated as source-confirmed.

Lower-confidence mappings to review carefully

Likely lecture	Q	Match	Why confidence is lower
T2.L7 — Management of normal labour	18	Likely	The normal-labour lecture covers intrapartum intermittent FHR auscultation and fetal surveillance; the item tests IA technique.
T3.L13 — Atrophic & dystrophic conditions of the vulva	22	Likely	The vulval-conditions lecture is the corpus's dedicated benign noninfectious vulval symptom/dermatosis topic, making it the closest source.
T1.L6 — Amenorrhea-dysmenorrhea-PMS	47	Likely	Amenorrhea covers hypothalamic low-FSH/LH stress amenorrhea; PCOS is the better alternate because it contrasts this pattern with PCOS.

Genuine cross-lecture overlaps — 17/48 questions

Primary → alternate	Q
T1.L3 — Sexual development & Puberty → T1.L6 — Amenorrhea-dysmenorrhea-PMS	1
T3.L17 — PPH & other Obstetric emergencies (case-based) → T3.L16 — Maternal collapse and its management (case-based)	2
T3.L6 — Contraception → T3.L12 — Postnatal care and puerperal sepsis	3
T2.L13 — Fetal malposition & malpresentations → T2.L5 — Anatomy of the pelvis & mechanism of normal labor	4
T2.L2 — Menopause → T2.L10 — Psychosocial problems & women's health	10

Primary → alternate	Q
T1.L10 — Multifetal gestation → T2.L9 — Role of Ultrasound in obstetric	13
T2.L15 — Pelvic organ prolapse → T2.L2 — Menopause	17
T1.L4 — Preconceptional counselling and antenatal care → T2.L9 — Role of Ultrasound in obstetric	23
T3.L11 — Emergency gynecology (case-based) → T2.L11 — Benign diseases of the ovary	26
T3.L2 — Gynecological problems in childhood & adolescence → T1.L3 — Sexual development & Puberty	31
T2.L17 — Operative vaginal delivery (case-based) → T2.L13 — Fetal malposition & malpresentations	32
T3.L3 — Anesthesia and analgesia in labour → T1.L14 — Medical Diseases & Pregnancy 1	33
T3.L10 — Abnormal labour and its management (case-based) → T3.L17 — PPH & other Obstetric emergencies (case-based)	40
T3.L2 — Gynecological problems in childhood & adolescence → T1.L3 — Sexual development & Puberty	42
T2.L11 — Benign diseases of the ovary → T3.L11 — Emergency gynecology (case-based)	44
T1.L6 — Amenorrhea-dysmenorrhea-PMS → T1.L7 — Polycystic ovary syndrome	47
T1.L7 — Polycystic ovary syndrome → T3.L1 — Subfertility	48

Source and item cautions

- **Q12:** the stem says oxygen “concentration,” while the options are flow rates; 15 L/min is supported by the maternal-collapse lecture.
- **Q18:** the exact Pinard/Doppler and timing technique is not stated in the verified normal-labour lecture.
- **Q19:** the sickle-cell item has potential single-best-answer ambiguity around prophylactic heparin wording.
- **Q22:** “vulvodynia” is absent from the verified corpus; the mapped vulval-conditions lecture is the closest topical source.
- **Q23:** wording differs between the first visible gestational sac and the earliest definitive yolk-sac sign; antenatal care is primary and ultrasound is alternate.
- **Q40:** the captured item has only three options, unlike surrounding four-option questions.
- **Q41:** the source capture was truncated; its options/key were reconstructed, although the Endometriosis lecture independently supports Sampson’s theory.
- **Q43:** the ovarian-cancer lecture strongly supports the topic, but does not explicitly state “transcoelomic” as the most common route.

Detailed evidence

- `final-2-question-to-lecture-map.csv` — all 48 questions with full text, primary/alternate lecture, confidence, rationale, keyed answer, and provenance.
- `final-2-lecture-focus-data.json` — machine-readable deck-only counts and mappings.
- The quiz’s **Likely lecture** flag shows the same mapping beside each live question.
